## The Heiniger Story

Since 1965, Heiniger's Swiss made clipping equipment has set the standard for quality, precision and reliability. Over the years Heiniger has continued to expand and innovate. As the world leader in animal clipping and shearing Heiniger recognised the growing trend in pet care and grooming, investing significant resources in the sector. Heiniger released its first professional small animal clipper, the Saphir, in 2008 which quickly developed a reputation for quality and has become the preferred choice by professional groomers around the world.

Heiniger's mission is to provide the industry with the Total Grooming Solution. Since 2008, their Grooming range has expanded to provide a wide range of quality products from professional grooming combs and brushes to the collection of ProGroom shampoos, conditioners, finishing sprays, colognes and the ProGroom Scissor range.

# The ProGroom Story

ProGroom was co-founded in 2009 by entrepreneur and pet-lover Natalie Ryan. Since then, ProGroom has become a trusted name in the Grooming industry, used and loved by professionals in Australia and New Zealand for many years.

**Natalie Ryan**  
ProGroom Founder

Formulated using naturally derived plant based surfactants in a shampoo base that is gentle, safe for pets and the hands that bathe them. ProGroom shampoos contain no soaps, no SLS or SLES, no parabens and no harmful petrochemicals.

Designed to address the needs of the professional groomers, our extensive range makes any grooming task simpler and enhances the look and feel of all coat types.

**Concentrated shampoos** work best when diluted for handbathing, and can be further diluted for hydrobaths resulting in less packaging and a reduced carbon footprint.

**Environmentally friendly** and biodegradable ingredients that are free from phosphates.

**Long-lasting fragrances** used in ProGroom products have been carefully selected to keep pets smelling fresher for longer.

## 3-Step Deshedding System

**Specifically formulated to assist in the removal of collected undercoat of double-coated breeds after the bath, eliminating the need to pre-groom heavy undercoated dogs before the bath.**

### Step 1 - Cleanse

A deeply penetrating yet gentle shampoo designed to cleanse and neutralize the ionic charge within the coat and remove all dirt, odour, and excess sebum. This prepares the coat for loose hair removal and begins the deshedding process.

500ml: FX-01-500    5L: FX-01-5L

### Step 2 - Release

Contains Protein ingredients which fill in damaged or rough areas of hair cuticle making a smooth surface that permits easy release of loose coat. Advanced silicone ingredients provide slip and allow dead coat to slide out with little or no force.

500ml: FX-02-500    5L: FX-02-5L

### Step 3 - Close

A mildly acidic silicone conditioning spray that further seals the hair cuticle and promotes maximum release of tangled and collected hair within the coat. Spray application allows the groomer to adjust the amount of product applied to different areas of the coat as needed.

500ml: FX-03-500    5L: FX-03-5L
